Company Introduction

- **SkyVista Airlines** is an airline company providing domestic and international air travel services. The company focuses on affordable fares, passenger comfort, and a smooth travel experience. Its main target customers are young travellers and business passengers.

Business Problem

- SkyVista Airlines is facing a customer retention problem. The airline attracts first-time passengers, but many of them do not choose SkyVista for their next journey. The company needs to understand customer needs and create better strategies to encourage repeat bookings.

Impact of the Problem

- **Loss of repeat customers**
- **Higher marketing costs**
- **Lower customer loyalty**
- **Customers shifting to competitors**
- **Declining customer engagement**

Identifying the Root Cause

- No personalised offers
- Poor follow-up after travel
- Limited loyalty benefits
- Offers not matching customer needs
- Lack of customer engagement

Role of Generative AI

Generative AI can help SkyVista Airlines understand customer needs and create personalised retention strategies. It can analyse customer feedback, suggest suitable offers, create targeted marketing messages, and develop loyalty-programme ideas. This can help the airline improve customer engagement and encourage passengers to book with SkyVista again.

Analyses Customer Feedback

Finds insights from reviews, surveys and comments.

Suggests Loyalty Strategies

Recommends rewards, benefits and engagement ideas.

Identifies Pain Points

Spotlights common customer issues and needs.

Generates Targeted Messages

Crafts relevant emails, notifications and ads.

Creates Personalised Offers & Campaigns

Suggests tailored deals based on customer preferences.

Helps Create a 30-Day Retention Plan

Builds a step-by-step plan to bring customers back.

Text Generation

 Email Version

Subject: Welcome Back to SkyVista! 

Thank you for choosing SkyVista Airlines for your first journey. We would love to welcome you back! Enjoy an exclusive 15% discount on your next booking, along with bonus loyalty points.

Book your next journey with SkyVista and continue travelling with us.

Fly More. Save More. Travel with SkyVista.

Image Generation

Create a photorealistic professional SKYVISTA airline advertisement poster showing an airplane wing flying above clouds and a coastal city during golden-hour sunset. Use cinematic lighting, realistic aircraft details, premium blue-and-white aviation branding, and clean modern typography. Include the headline “More Destinations. More You.”, “6E | On Time. Always.”, a “Book Now” button, and minimal aviation service icons. Make it look like a real commercial airline advertising campaign.

Conclusion

Overall, Generative AI can help SkyVista Airlines turn customer data and feedback into personalised retention strategies. By using ChatGPT, the airline can identify customer needs, create personalised offers, generate targeted messages, and improve its loyalty programme. These AI-based strategies can increase repeat bookings, improve customer engagement, reduce customer loss to competitors, and build stronger long-term relationships with passengers.
